Galen, Gaelic for "Little Bright One", our 3rd and youngest male comes from a very special breeding. His Sire & Dam, both "Old Line Shilohs" were brought together to produce this highly anticipated litter. His Dam (Kye) comes from a kennel of Shepherds which were used to create the Shiloh Shepherd Breed years ago. She is from Selah Kennels, a kennel that has always produced huge sound German Shepherds with gentle loving temperament. His Sire (Bull) is also an "Old Line Shiloh" whose roots can be traced back to the origin of the Shiloh Breed. Galen is registered as both a GSD and a Shiloh Shepherd. Providing his health testing proves satisfactory he will be used to create sound, stable, big and beautiful shilohs of the future and to diversify the current gene pool.

Despite all the expectations for his future, right now Galen is busy being a puppy and learning how to be a Shiloh from his two big brothers. Please check back often to watch the progress of Galen as he matures into a Handsome Young Adult.
